**SUBJECT: APPROVAL OF RESPONSE TO COMMENTS ON 2020 ANNUAL
GROUNDWATER MONITORING REPORT**

RE: SITE NAME: **CEDAR SERVICE, INC., SHOREHAM FACILITY, MINNEAPOLIS, MINNESOTA**
MDA PROJECT NO: **RWA253128**

Dear Ms. French:

Minnesota Department of Agriculture (MDA) Incident Response Unit staff has reviewed Golder's August 31, 2021 *Response to MDA Comments on the 2020 Annual Groundwater Monitoring Report* (Report) for the Cedar Service Site in Minneapolis, Hennepin County, Minnesota.

Based on the review, MDA staff approve the report contingent upon the incorporation of the following comments:

- Based on the information provided by Golder Associates in response to MDA Comment No. 4A, the MDA agrees that an additional downgradient well in the St. Peter Mudstone is not a priority at this time. Therefore, based on the current contaminant and groundwater conditions, the MDA agrees with the installation of one well, in the OPD unit west of MW03-59-OPD or in the location of MW01-01-BR (Comment No. 5). As recommended in the Report, please submit a work plan for installation, construction, and sampling of a new OPD well in this area.
- Please provide an update on the revised receptor survey.

Thank you for your cooperation in responding to this incident and helping to preserve and protect Minnesota's natural resources. If you have any questions on this project, please contact MDA project manager, Lee Zettler at (651) 201-6394 or Lee.Zettler@state.mn.us.

Sincerely,

Ms. Karlene French, Canadian Pacific Railway
