SUBJECT: APPROVAL OF 2021 ANNUAL GROUNDWATER MONITORING REPORT

RE: SITE NAME: **CEDAR SERVICE, INC., SHOREHAM FACILITY, MINNEAPOLIS, MINNESOTA**
MDA PROJECT NO: **RWA253128**

Dear Ms. French:

Minnesota Department of Agriculture (MDA) Incident Response Unit staff has reviewed Golder Associate's October 2021, *2021 Annual Groundwater Monitoring Report* (Report) for the Cedar Service Site in Minneapolis, Hennepin County, Minnesota.

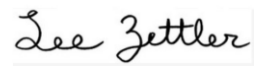

Based on the review, MDA staff approve the report contingent upon the incorporation of the following comments:

- In the July 27, 2021 Approval of Response to Comments on 2020 Annual Groundwater Monitoring Report Letter, the MDA requested iso-concentration cross section figures be completed for the 2021 Annual Groundwater Monitoring Report to help to understand the groundwater contamination profile at the Site. While the MDA appreciates the north-south iso-concentration cross section figure provided in Figure 8, the MDA requests that an east-west iso-concentration cross section figure be provided as well. The east-west iso-concentration cross section figure should bisect the Site.
- In the March 25, 2021 Approval of 2020 Annual Groundwater Monitoring Report letter, in addition to the bullet points listed on pages 13 through 14 of the Report, the MDA requested an updated well receptor survey be conducted.

Thank you for your cooperation in responding to this incident and helping to preserve and protect Minnesota's natural resources. If you have any questions on this project, please contact MDA project manager, Lee Zettler at (651) 201-6394 or Lee.Zettler@state.mn.us.

Ms. Karlene French, Canadian Pacific Railway
