SUBJECT: APPROVAL OF TECHNICAL MEMORANDUM AND MONITORING WELL DRILLING NOTIFICATION

RE: SITE NAME: **CEDAR SERVICE, INC., SHOREHAM FACILITY, MINNEAPOLIS, MINNESOTA**
MDA PROJECT NO: **RWA253128**

Dear Ms. French:

Minnesota Department of Agriculture (MDA) Incident Response Unit staff has reviewed WSP Golder's April 7, 2021 *Technical Memorandum* (Cedar Service OPD Sampling Well Work Plan) and *Monitoring Well Drilling Notification* for the Cedar Service Site in Minneapolis, Hennepin County, Minnesota. Based on the review, MDA staff approve the above mentioned reports with incorporation of the following comments:

General Comments

- The proposed well location is adjacent to a school. A temporary fence may need to be set up to delineate the exclusion zone.
- The proposed well location may be near underground utility lines such as natural gas or electricity. A variance may be needed if minimum setbacks are not met.

Thank you for your cooperation in responding to this incident and helping to preserve and protect Minnesota's natural resources. If you have any questions on this project, please contact MDA project manager, Lee Zettler at (651) 201-6394 or Lee.Zettler@state.mn.us.

Sincerely,

Lee Zettler, Project Manager
Pesticide and Fertilizer Management Division
Incident Response Unit

Ms. Karlene French, Canadian Pacific Railway
