* On invoices denominated in Canadian dollars, the USD Fuel Cost Adjustment will be converted to Canadian currency based upon the Bank of Canada average exchange rate (U.S. dollar (close)), available at www.bankofcanada.ca. The conversion will be based on the 15 day average exchange rate prior to 20 days preceding each Application Period.

**"No. 2 Diesel Retail Sales by all Sellers" index for highway diesel fuel (HDF) published by the U.S. Department of Energy's Energy Information Administration (EIA).

Table 2: Bulk surcharge calculation

For each 2.4 cent per gallon increase in HDF average price, the bulk fuel cost adjustment will be an additional 0.5 cents per mile.

HDF average price per gallon (USD)*		Bulk fuel cost adjustment (USD per mile)

Program mechanics

This program applies a fuel cost adjustment (FCA) based on cents per loaded route mile for bulk or carload traffic:

- The bulk factor applies to grain, coal, fertilizer, and sulphur shipments and will be adjusted by ½ cent per mile for each 2.4 cent change in the HDF average price (see Table 2).
- The carload factor applies to all other carload shipments and will be adjusted by ½ cent per mile for each 2.2 cent change in the HDF average price (See Table 3).

Mileage-based FCA does not apply to Intermodal traffic – see Tariff 9900 for Intermodal FCA.

Mileage

- A route mileage calculator is available on the MyCPR customer website to help customers validate the route miles used to calculate their fuel cost adjustment.
- CP uses the latest version of ALK Technologies PC*Miler Rail. The mileage-based fuel program is administered using route miles based on the PC*Miler Rail Fuel surcharge router (FNII) non familized. For joint-line moves, the FNII router observes each carrier's routing preference to calculate that carrier's mileage. The route miles applied will reflect the "Fuel Surcharge" miles based on the designated routing found within the rate authority(ies) applied against the shipment. When two or more rate authorities are used in combination to form a single rate, miles will be calculated for each rate authority representing each leg of the shipment.
- ALK can be contacted through their website at www.alk.com to acquire the ALK Technologies software in order to source route miles for origin/destination pairings.
